8th International Symposium on Functional Gastrointestinal Disorders

Statement of Need

Functional gastrointestinal disorders are among the most common conditions seen by primary care and specialty practices. Research is rapidly changing the understanding of the multiple underlying mechanisms in these disorders. Patient management and treatment remains challenging, and there is a lack of effective pharmacologic treatments available. The 8th International Symposium on Functional Gastrointestinal Disorders has been developed to enhance the knowledge and skills of physicians, psychologists, nurses and allied health professionals in their care of patients with functional gastrointestinal disorders.

Objectives

At the conclusion of this activity, participants will be able to:

- Apply advances in the pathophysiology of the functional and motility gastrointestinal (GI) disorders
- Apply newer technologies involved with diagnostic assessment of the functional GI disorders
- Evaluate and apply the latest “hot topic” advances in understanding brain-gut interactions, gut flora, receptors and drugs
- Develop improved clinical skills in the diagnosis and care of patients with functional GI disorders
- Apply the strategies and skills relating to interview technique, communication skills, and patient-centered care in order to improve patient satisfaction, adherence, and clinical outcome
- Benefit from networking and sharing information experiences with other conference participants
- Recognize the influence of genetics, early life, and socio-cultural factors on the clinical expression of functional GI disorders
- Identify the role of neurotransmitters and receptors in the development of clinical symptoms

Target Audience

This activity has been designed to meet the needs of clinicians and other health care professionals who are looking to enhance their knowledge and skills for the care of their patients with functional gastrointestinal disorders.

Elements of Competence

This activity has been designed to address the general competencies of patient care, medical knowledge, practice based learning and improvement and interpersonal and communication skills.

Accreditation Statement

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the University of Wisconsin School of Medicine and Public Health and the International Foundation for Functional Gastrointestinal Disorders. The University of Wisconsin School of Medicine and Public Health is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation Statement

The University of Wisconsin School of Medicine and Public Health designates this educational activity for a maximum of 20 *AMA PRA Category 1 Credits™*. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Continuing Education Units

The University of Wisconsin-Madison, as a member of the University Continuing Education Association (UCEA), authorizes this program for 2.0 continuing education units (CEUs) or 20 hours.

Policy on Disclosure

It is the policy of the University of Wisconsin School of Medicine and Public Health that the faculty, authors, planners, and other persons who may influence content of this CME activity disclose all relevant financial relationships with commercial interests in order to allow CME staff to identify and resolve any potential conflicts of interest. Faculty must also disclose any planned discussion of unlabeled/unapproved uses of drugs or devices during their presentation(s). Detailed disclosures will be made in the activity handout materials.

AM

- 7:00 Registration and Breakfast
 8:00 Greetings: *Nancy J. Norton; Stephen P. James, MD; Emeran A. Mayer, MD*

AM Plenary – Clinical Approach

- 8:20 Moderator: *Douglas A. Drossman, MD*
 8:25 Integrated Approach to FGID
Douglas A. Drossman, MD
 9:00 Pathophysiology of FGID
Robin Spiller, MD
 9:20 Discussion
 9:45 Refreshment Break

Hot Topics: Brain Gut

- 10:00 Moderator: *Robin Spiller, MD*
 10:05 Basic Principles of Neurophysiology for the Clinician
Gary Mawe, PhD
 10:25 Mast Cells, Visceral Sensitization and Inflammation
Giovanni Barbara, MD
 10:45 The Brain-Gut-Microbial Axis in Health and Disease
Stephen M. Collins, MBBS, FRCP(UK), FRCPC
 11:05 Bacterial Flora, Probiotics and Antibiotics
Eammon M.M. Quigley, MD
 11:25 Imaging Genetics in Functional Pain Disorders
Emeran A. Mayer, MD
 11:45 Summary
Robin Spiller, MD
 11:55 Discussion
 12:25 Lunch

PM Plenary – Hot Topics: Receptors & Drugs

- 1:30 Moderator: *William D. Chey, MD*
 1:35 Dopamine Receptors
Jackie D. Wood, PhD
 1:50 Secretagogues
Michael Camilleri, MD
 2:05 CRF / HPA
Yvette Taché, PhD
 2:20 Opioids and Hyperalgesia
